# LIPIcs - Leibniz International Proceedings in Informatics

LIPIcs is a series of high-quality conference proceedings across all fields in informatics. LIPIcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

# Editorial Board

- Luca Aceto (Chair, Gran Sasso Science Institute and Reykjavik University)
- Christel Baier (TU Dresden)
- Mikolaj Bojanczyk (University of Warsaw)
- Roberto Di Cosmo (INRIA and University Paris Diderot)
- Javier Esparza (TU München)
- Meena Mahajan (Institute of Mathematical Sciences)
- Dieter van Melkebeek (University of Wisconsin-Madison)
- Anca Muscholl (University Bordeaux)
- Luke Ong (University of Oxford)
- Catuscia Palamidessi (INRIA)
- Thomas Schwentick (TU Dortmund)
- Raimund Seidel (Saarland University and Schloss Dagstuhl Leibniz-Zentrum für Informatik)

# Contents

Preface  Marc Bezem and Assia Mahboubi	0:vii
List of Authors	0:ix
Regular Papers	
Making Isabelle Content Accessible in Knowledge Representation Formats  Michael Kohlhase, Florian Rabe, and Makarius Wenzel	1:1-1:24
Type Theory Unchained: Extending Agda with User-Defined Rewrite Rules  *Jesper Cockx**	2:1-2:27
A Quantitative Understanding of Pattern Matching Sandra Alves, Delia Kesner, and Daniel Ventura	3:1-3:36
Big Step Normalisation for Type Theory  Thorsten Altenkirch and Colin Geniet	4:1-4:20
From Cubes to Twisted Cubes via Graph Morphisms in Type Theory  Gun Pinyo and Nicolai Kraus	5:1-5:18
For Finitary Induction-Induction, Induction Is Enough Ambrus Kaposi, András Kovács, and Ambroise Lafont	6:1-6:30
Eta-Equivalence in Core Dependent Haskell  Anastasiya Kravchuk-Kirilyuk, Antoine Voizard, and Stephanie Weirich	7:1-7:31
Coherence for Monoidal Groupoids in HoTT  Stefano Piceghello	8:1-8:20
Is Impredicativity Implicitly Implicit?  Stefan Monnier and Nathaniel Bos	9:1-9:19
Higher Inductive Type Eliminators Without Paths  Nils Anders Danielsson	10:1-10:18

# Preface

This volume constitutes the post-proceedings of the 25th International Conference on Types for Proofs and Programs, TYPES 2019, held in Oslo, Norway, 11–14 June 2019.

The TYPES meetings are a forum to present new and on-going work in all aspects of type theory and its applications, especially in formalised and computer assisted reasoning and computer programming. The meetings from 1990 to 2008 were annual workshops of a sequence of five EU-funded networking projects. Since 2009, TYPES has been run as an independent conference series. Previous TYPES meetings were held in Antibes (1990), Edinburgh (1991), Båstad (1992), Nijmegen (1993), Båstad (1994), Torino (1995), Aussois (1996), Kloster Irsee (1998), Lökeberg (1999), Durham (2000), Berg en Dal near Nijmegen (2002), Torino (2003), Jouy-en-Josas near Paris (2004), Nottingham (2006), Cividale del Friuli (2007), Torino (2008), Aussois (2009), Warsaw (2010), Bergen (2011), Toulouse (2013), Paris (2014), Tallinn (2015), Novi Sad (2016), Budapest (2017), and Braga (2018).

The TYPES areas of interest include, but are not limited to: foundations of type theory and constructive mathematics; applications of type theory; dependently typed programming; industrial uses of type theory technology; meta-theoretic studies of type systems; proof assistants and proof technology; automation in computer-assisted reasoning; links between type theory and functional programming; formalizing mathematics using type theory.

The TYPES conferences are of open and informal character. Selection of contributed talks is based on short abstracts; reporting work in progress and work presented or published elsewhere is welcome. A formal post-proceedings volume is prepared after the conference; papers submitted to that volume must represent unpublished work and are subjected to a full peer-review process.

TYPES 2019 was held in parallel with HoTT-UF, the workshop on Homotopy Type Theory and Univalent Foundations, 12–14 June 2019, in Oslo. Wednesday 12 June the two events had a joint programme. Both events were part of the Special Year 2018/19 on Homotopy Type Theory and Univalent Foundations at the Centre for Advanced Study (CAS) at the Norwegian Academy of Science and Letters.

The program of the conference consisted of 50 contributed short presentations and four invited lectures of one hour. The invited lecturers were: Adam Chlipala, Conor McBride, Assia Mahboubi and Stephanie Weirich. The combined events TYPES 2019 and HoTT-UF gathered 115 participants from around 20 countries.

There were 12 submissions to this open post-proceedings volume, the large majority related to presentations at the conference. After a thorough peer-review procedure of two rounds, 10 submissions could be accepted for publication. We thank all authors, reviewers, and members of the program committee for their contribution to this volume.

# **Sponsors**

The Centre for Advanced Study (CAS) at the Norwegian Academy of Science and Letters provided generous support, both financial and administrative, which we gratefully acknowledge. We are also grateful for the support of COST Action CA15123 EUTypes and of the Research Council of Norway, project 240810 Computational Aspects of Univalence (2015–2020).

Marc Bezem and Assia Mahboubi, July 2020

# List of Authors

Thorsten Altenkirch (4) School for Computer Science, University of Nottingham, UK

Sandra Alves (3) DCC-FCUP & CRACS, University of Porto, Portugal

Nathaniel Bos (9)

McGill University – SOCS, Montréal, Canada

Jesper Cockx (D) (2)

Department of Software Technology, TU Delft, The Netherlands

Nils Anders Danielsson (10) University of Gothenburg, Sweden

Colin Geniet (4) Computer Science Department, ENS Paris-Saclay, France

Ambrus Kaposi (6)

Eötvös Loránd University, Budapest, Hungary

Delia Kesner (3)

Université de Paris, CNRS, IRIF, France Institut Universitaire de France, France

Michael Kohlhase  $\bigcirc$  (1)

University Erlangen-Nürnberg, Germany

András Kovács (6)

Eötvös Loránd University, Budapest, Hungary

Nicolai Kraus (5) School of Computer Science, University of Nottingham, UK

Anastasiya Kravchuk-Kirilyuk (7) Princeton University, NJ, USA

Ambroise Lafont (6) IMT Atlantique, Inria, LS2N CNRS, Nantes, France

Stefan Monnier (9)
Université de Montréal – DIRO, Canada

Stefano Piceghello (8)
Department of Informatics and Department of
Mathematics, University of Bergen, Norway

Gun Pinyo (5) School of Computer Science, University of Nottingham, UK

Florian Rabe (1)

University Erlangen-Nürnberg, Germany

Daniel Ventura (3) INF, Universidade Federal de Goiás, Goiânia, Brazil

Antoine Voizard (7) University of Pennsylvania, Philadelphia, PA, USA

Stephanie Weirich (7) University of Pennsylvania, Philadelphia, PA, USA

Makarius Wenzel (1) Selfemployed, Augsburg, Germany
